OBJECTIVE

Third-year BTech student in Digital Transformation at Atria University, focused on data science and machine learning. I have hands-on experience with Python, SQL and JavaScript from academic projects in classification, clustering and anomaly detection, and from building web applications. Looking for an internship in data science, analytics or software development where I can work on real problems and keep learning.

TECHNICAL SKILLS

Data Science & ML: Python, Data Analysis, Classification, Regression (Ridge, Lasso, ElasticNet), Clustering (K-Means), Anomaly Detection

Programming: Python, JavaScript, HTML, CSS, Tailwind CSS, MySQL

Tools: Git, GitHub, VS Code, MySQL Workbench

Core Concepts: OOP, Basic Data Structures, Responsive Design

ACADEMIC PROJECTS

Startup Success & Funding Analysis

Data Science / ML

Classification, K-Means, Ridge, Lasso, ElasticNet

- Analysed startup data (total funding, funding rounds, total investment, industry group and continent) to study what drives company success.
- Built classification models, grouped startups with K-Means, and compared Ridge, Lasso and ElasticNet regression.

Customer Segmentation & Anomaly Detection

Unsupervised Learning

Clustering, Anomaly Detection, Online Retail Transaction Data

- Segmented online retail customers into groups based on their transaction behaviour.
- Flagged unusual transactions that did not fit normal purchasing patterns.

Visit Rajasthan

[Live site](#)

Three.js, TypeScript, Vite, Blender

- Interactive travel website covering Jaipur, Jaisalmer, Jawai and Udaipur, with a WebGL landing scene and isometric city tiles modelled in Blender.

EDUCATION

Atria University, Bangalore

2024 – Present

BTech, Digital Transformation (Third Year) · CGPA 7.3 (pursuing)

Bangalore, Karnataka

SOFT SKILLS

Communication · Teamwork · Time Management · Problem Solving
